Instructions for Use

Precautions for Use

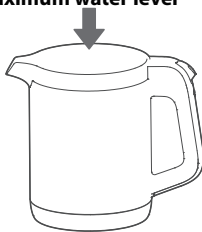

- Please reset the water outlet lock button after pouring water or before boiling water.
- Do not add water exceeding the maximum water level during use.
- This product adopts a structure to reduce steam emission. Only a small amount of steam will be emitted during normal boiling.
- The lid of this product contains a steel ball to prevent water leakage when it is dumped. It is normal to make a sound when shaking. In case of dumping, it can also suppress water leakage.

Water Boiling Steps

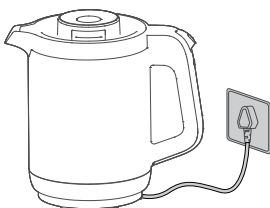

- 1** Open the kettle lid as shown below

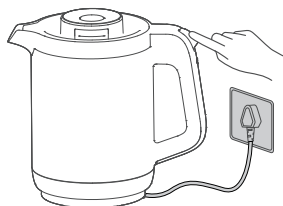

- 2** Add clean water to the kettle and cover the kettle lid. Be careful not to exceed the maximum water level

- 3** Place the kettle on the power base and turn on the power

- 4** Press the switch button, the heating indicator light will light up, and the kettle will start to heat

Water Pouring Steps

- 1** Press the water outlet lock button to unlock the water outlet

- 2** After unlocking, you can pour water for drinking

Water Pouring Steps

- 3** After pouring, press the lock button again to lock the water outlet button

Cleaning and Maintenance

Cleaning and Maintenance Precautions

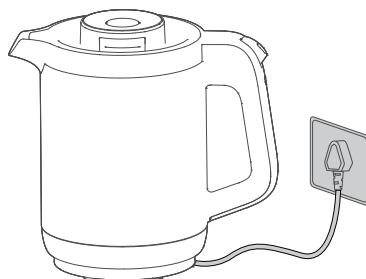

- Before cleaning, please make sure that the power plug is unplugged from the socket and wait until the electric kettle cools down.
- To extend the service life of the electric kettle, the mineral deposits (scale) in the water kettle should be cleaned regularly, and descaling agents (such as white vinegar, citric acid) can be used for cleaning.

Daily Cleaning

- 1** Disconnect the power supply and add descaling agent and clean water to the kettle

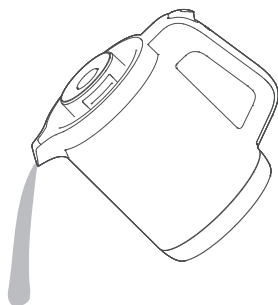

- 2** Turn on the power supply and boil the descaling agent solution

Daily Cleaning

- 3** Pour out the descaling agent solution after standing for a while

- 4** Rinse the inner tank with clean water and wipe it dry with a clean soft cloth
