ADVANCED TECHNOLOGIES

THE
GREATWAVES™

THE GREATWAVES™ is an innovative technology inspired and aptly named after the Japanese famous painting "The Great Wave off Kanagawa".

THE GREATWAVES™ technology combines Flush Wave and Cold Wash to offer energy saving and colour protection for your laundry.

FLUSH WAVE

As Good As Hand Wash

Featuring a big cambered, wing-type paddle and a smooth inner drum, THE GREATWAVES™ technology generates Flush Wave, making fabrics rub and scrub against each other to get the same effect as hand wash.

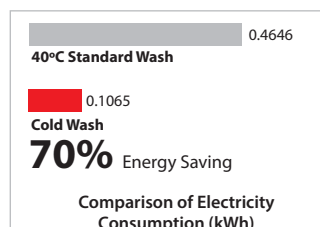

Greater Than Normal Flow

Unlike the normal flow, GREATWAVES™ technology can adjust rotation speed intelligently, which will generate different types of water flow Flush Wave, penetrating fabric to break and remove stubborn stains.

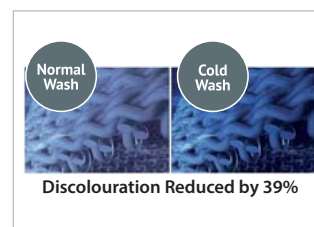

COLD WASH

Energy Saving

THE GREATWAVES™ technology activates Cold Wash function to save up to 70% energy based on the same cleaning effect of washing at 40°C, according to lab experiments.

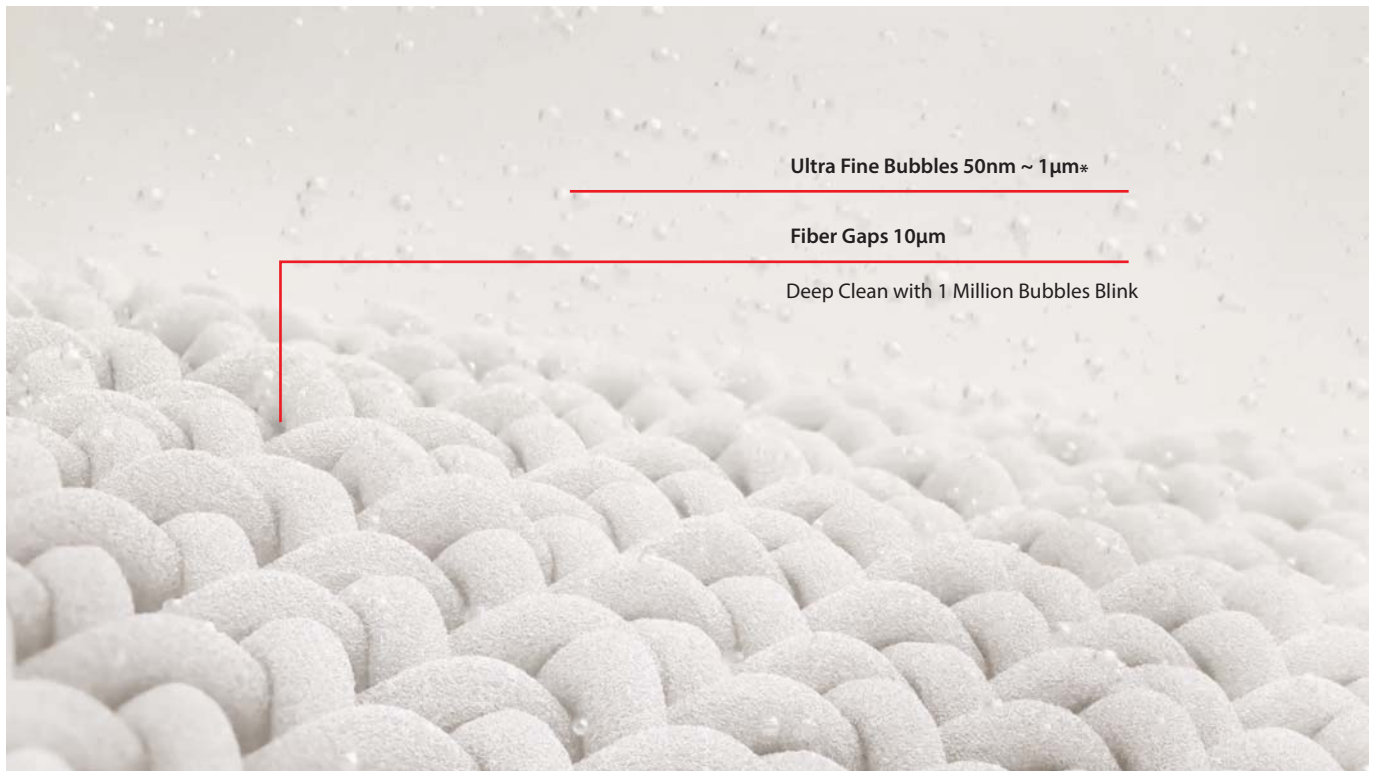

Colour Protection

ColorAlive program is developed based on Cold Wash function to achieve remarkable colour protection. Tests by Household Electricity Appliance Research Institute show that ColorAlive can reduce discolouration by 39%.

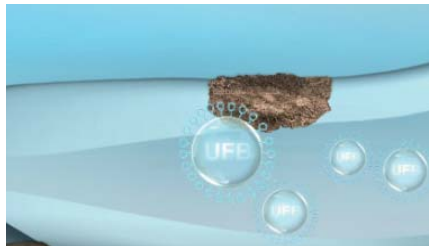

ULTRA FINE BUBBLE*

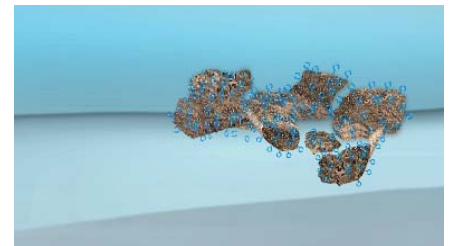

Nano-sized bubbles penetrate into fabric fibers to remove the deepest stains, bacteria and residues, thus to achieve the best deep cleaning.

UFB bubbles with conductivity attach detergent massively.

Nano-sized UFB bubbles penetrate fiber gaps.

UFB bubbles break and remove stains.

BENEFITS OF ULTRA FINE BUBBLE

As sebum dirt is not soluble in water it is more likely left in fiber gaps resulting in yellowing stains for a long time.

Sebum dirt is soluble in detergent. UFB carrying detergent penetrate fiber gaps, dissolve and remove as much as 6% sebum dirt away.

UFB dissolve and remove stains. Thus prevent yellowing and make fabric fresh and long-lasting.

SENSEDY™ tech automatically stops drying process when clothes reach optimum dryness. It saves you valuable time as you need not check during the drying process. It also protect your clothes and no more worry of over drying.

Compared to conventional motor, Real Inverter motor is quieter by 11.4% noise down, more efficient and durable.

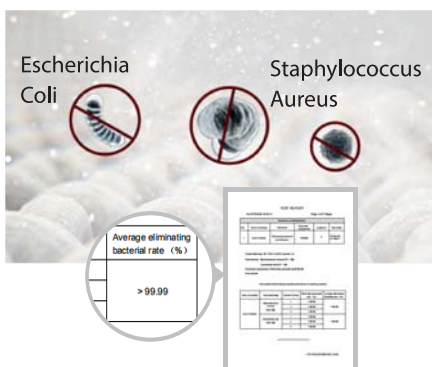

Quiet: Inverter motor works 10% quieter than universal motor.

Durable: 10 Years stable warranty.

Efficient: Compared with universal motor, inverter motor reaches more than 67% power saving.

* Selected Models

The steam function is activated to have the inner drum temperature raised and the water flows penetrate deep into fabric fibers. The main advantage of steam scalding is 99.99% sterilizing*¹ and fabric deodorizing.

* Selected Models *¹ Tested by Vkan Certification & Testing Co., Ltd.

Smart control

Remote control
Control your washing machine anytime, anywhere with TSmartLife

Real-time reservation
Set your laundry schedule easily and arrange your time wisely

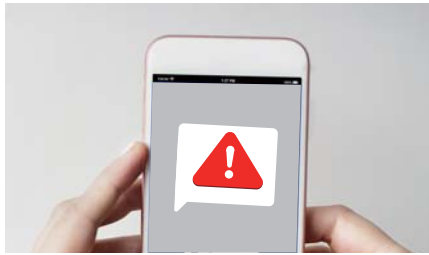

Cloud program
Access more programs and options with TSmartLife

Prompt assistant

Program completion push
TSmartLife can remind you that the program has finished in time

Error status alerts
Get error alerts once malfunction happens

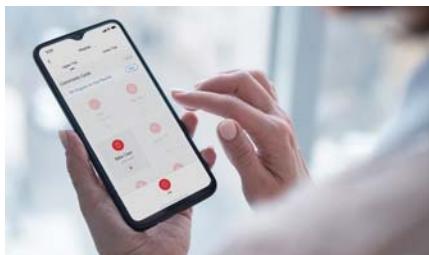

Self-clean reminder
TSmartLife cares about the health of you and your appliances

Laundry care

Laundry guide
have no idea of program selection? TSmartLife gives you professional laundry advice

Program DIY
You can set up to 5 of your favorite programs and adjust parameters to use them easily

WASHER DRYER

DUAL-DRUM WASHING MACHINE

Integrated Front Door And Cabinet

The front door is designed to be fully enclosed and the control device is completely invisible, allowing you to seamlessly integrate it anywhere in your home.

4D Aviation Capsule Window

Overlook the Vast Universe

Drawing from the design of space capsule glass, the washing machine is non-corrosive, anti-scratch, transparent and simply beautiful. The door adopts a 4D aviation pattern for an immersive visual experience of outer space.

Borderless TFT Display

Washing Process in Control

Dual-Engine Balance System

Quiet and Steady

Adopting a Ferris wheel structure design with 8 bars and 4 columns, the dual drums run stably. Both drums are equipped with 7 shock absorbers and 4 suspension rods, ensuring quiet and stable operations at all times.

Partition Design

Care for Different Needs

Upper Drum is for the delicate, such as underwear, baby wears and pets' clothes. Lower Drum offers one-step to wash and dry. Partition wash for specific care.

TOSHIBA

5Kg Specific Care

Wash Separately, Grow Healthily

The upgraded upper drum capacity accommodates for every stage of growth. Separate washing can help to provide greater protection for your child's health.

Ag+

In-deep Sterilization

Upon touching water, the nanoparticle silver impellers release Ag+ which can penetrate deep into the fabrics and eliminate bacteria, improving the sterilization rate up to 99.9%*.

SenseDose™

Precise Dispensing and Saving

An appropriate amount of detergent is automatically dosed based on the weight and material of laundry to ensure the best washing performance. SenseDose™ can prevent waste and excessive residues caused by overdose, as well as poor washing performance due to a lack of detergent.

Smart Air Wash

Care for 18 Kinds of Fabrics

Smart fabric detection technology allows you to carefully protect your delicate clothing at home, without the need of hand washing or dry cleaning.

10/7Kg Wash And Dry

Large Capacity to Meet Your Needs

Bedding, curtains and other large items can be easily tumbled, washed, and dried, meeting the needs of families of four and more.

Ag+

Long-lasting Protection

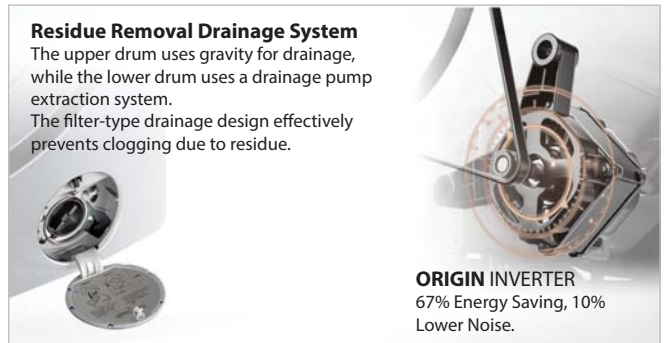

The cold extraction silver ions imported from Japan can attach to the surface of fibers and form an ionic membrane. It provides long-lasting antibacterial protection, preventing secondary contamination when you dry your laundry.

360° SPRAY

99.99% Sterilization

With a built-in spray nozzle on the front door, cold-extracted silver ions are dispersed to all corners of the capsule through a strong 360° water flow, ensuring complete sterilization.

DRYER

TOSHIBA

SENSEDRIY™

SENSEDRIY™ is a composite resistor that can sense the humidity of clothes with precision to control the drying process. Thus, **SENSEDRIY™** technology can stop drying when the clothes have achieved optimum drying. It is a convenient feature that saves you the hassle of constant checking and protects your clothes from overheating.

The humidity sensor, which is the core component to activate **SENSEDRIY™**

Anti-Crease

Designed for tumble dryers, the Anti-crease function keeps clothes from wrinkling after drying.

20-Min Quick Drying*

Fast drying program designed especially for small loads to finish within 20 minutes.

Condenser Drying

The circulating air enters the condenser and meet with the fresh air. Heat exchanges in the condenser and the water vapor condenses into water; the air after cooling enters the heater then get into the drum, and completes a cycle.

QUIET OPERATION & HIGH PERFORMANCE WASHING

Super-Direct Drive (S-DD) Inverter Motor Technology which is gear/belt free takes your washing to a whole new realm of high performance washing with unrivalled noise reduction. With more powerful turns and reduced vibration during spinning, your washing operates practically on whisper mode with clothes that come out clean and tangle-free.

POWER WASH

The innovative technology of the Power Pulsator efficiently accelerates powerful water circulation. Clothes are stirred effectively and dirt in deep fibers can be cleaned thoroughly with less damage.

CONDENSED BUBBLE WASH

Detergent is more concentrated at low water levels. Laundry will thus be more thoroughly cleansed.

POWER PULSATOR

Double amount of water circulates in the drum can improve washing performance.

DRUM ILLUMINATION

LED equipped in drum lights up when UFB is generated. It also works when glass lid is open for convenience in dark places.

FRAGRANCE COURSE

Softener dispenser releases the fabric softener automatically. A stronger fragrance effect is achieved on your laundry thanks to the longer soaking time.

SAFETY GLASS LID DESIGN

A modern design with glossy safety glass and handle-less lid. Offered in classic steel or black color. Gentle closing lid, ensure safe operation.

RESUME FUNCTION

Resumes the washing process from the point of interruption in the event of a power failure.

HYGIENE TUB CLEAN COURSE / I CLEAN

The washing tub can be easily cleaned with one touch. Stains and detergent residue are effectively removed for a clean wash. Using 'THE GREAT WAVES™' course, the self clean (I CLEAN) is automatically done each time once you do the laundry.

3D SIX BLADES

1,170 holes on Power Pulsator allow more water into the water channel, this efficient water circulation effectively removes dirt and stains.

CIRCULAR AIR INTAKE

More air flows into the tub from circular air inlets to increase drying efficiency. This also prevents shrinkage of clothing and saves energy.

PRE-SET HOURS

Select your preferred washing end time from 2 hours late to 24 hours later, easy & convenient.

ONE TOUCH BUTTON

One Touch Button system displayed on a newly designed panel makes laundry quick and easy with convenient washing options.

1 Press 1 Load. Once Add for 1 Month.

TOSHIBA pioneering injection device for top loader, EXDOT, initiates a more interactive, efficient, and user-friendly solution to liquid dosing.

STORAGE TANKS

Liquid Detergent And Softener Tanks (1000ml)

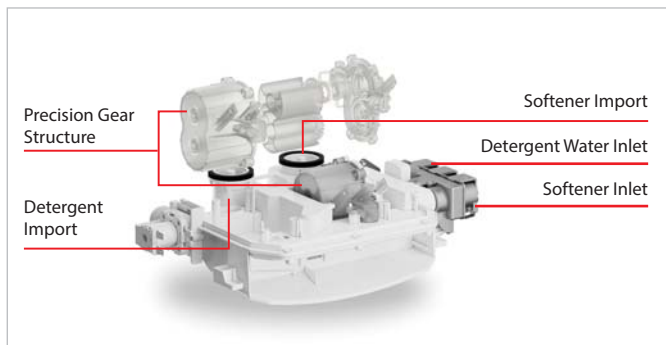

More convenient and efficient.

Cleaner

Independent tank storage without mutual contamination.

Detachable

Easy to clean and maintain cleanliness.

PRECISION DOSING SYSTEM

The dual dosing units with precise gears and blades inside connect storage tanks with injection device together, and separately dose of detergent and softener into the transparent cabinet to fully mix with water.

INJECTION STRUCTURE

(1 Press 1 Load)

Magic Filter Pro

The removable filter can be easily taken out, so that leading it to be simple to clean up the lint, fluff and particles. It only takes a small effort to keep your machine working its best.

ORIGIN Inverter

The powerful motor directly drives the tub without belt and pulleys, which eliminates power loss and consumption of components and reduces noises effectively.

Long-Lasting Fragrance

COLD WATER INLET MODEL

When pre-soaking clothes, you can select and add the soaking time. By fully soaking the laundry, it effectively removes stubborn stains and odors. Keep your clothes smelling fragrance and fresh.

Unique Door Lock

When the program is paused in the middle, buffer time is reserved to stop the rotation of the inner tub at high speed. Enhancing security to protect users' safety.

■ Allergy UK
Allergy UK certification ensures 4 allergens, i.e. house dust mite allergen, cat allergen, dog allergen and pollen allergen, are reduced to less than 99.9% after a wash cycle.

■ Woolmark

Woolmark certification ensures low fabric shrinkage, high cleaning efficiency and accurate water temperature control during the whole washing process.

■ VDE

VDE is an independent and neutral institute that tests electronic devices, components and systems. VDE certification ensures high efficiency and low energy consumption.

TWIN TUB WASHER

TOSHIBA

The most economic laundry options for both long duration and practical function.

Transparent LID

Transparent design door, convenient for users to check the laundry's status.

Rust-Free Body

The body is made of plastic. It is durable with no rust and it is hard to be dented.

Cassette Lint Filter

Plastic cassette lint filter is more durable than conventional cloth lint filter. In addition, lint can be easily removed from filter manually.

Goldensoak Period

Soaking time can be selected according to the pollution level of fabrics, which allows to apply with other programs to enhance the washing effects.

CycloneSpin™

A high spin speed up to 1280rpm can effectively help to take water away from fabrics.

Double Water Inlets For Wash & Spin (Right & Left)

Using the inlet for water into spin tub, it is easy to activate the shower rinse to save water.

Program (Heavy & Normal)

Select A Preset Program For Various Types Of clothes (Wash / Drain).
