

SensTemp™

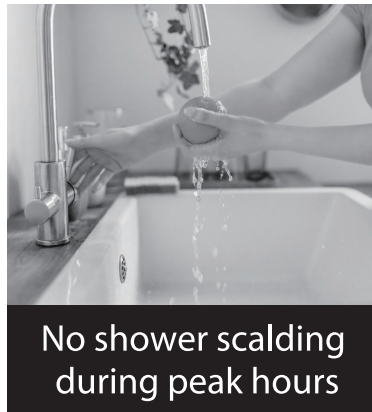

SensTemp™ Series **WATER HEATER**

TOSHIBA

SensTemp™ STABLE TEMP SYSTEM

TOSHIBA EXCLUSIVE

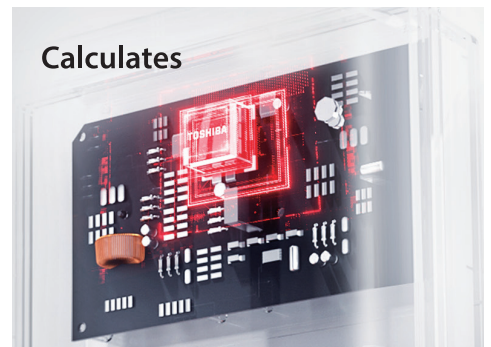

Detects

Hall-Effect Flow Sensor & Water Temp Sensor

Detects the inlet water flow and water temperature accurately, in real time.

Calculates

Smart Chip

Calculates the heating power needed to reach the set shower temperature.

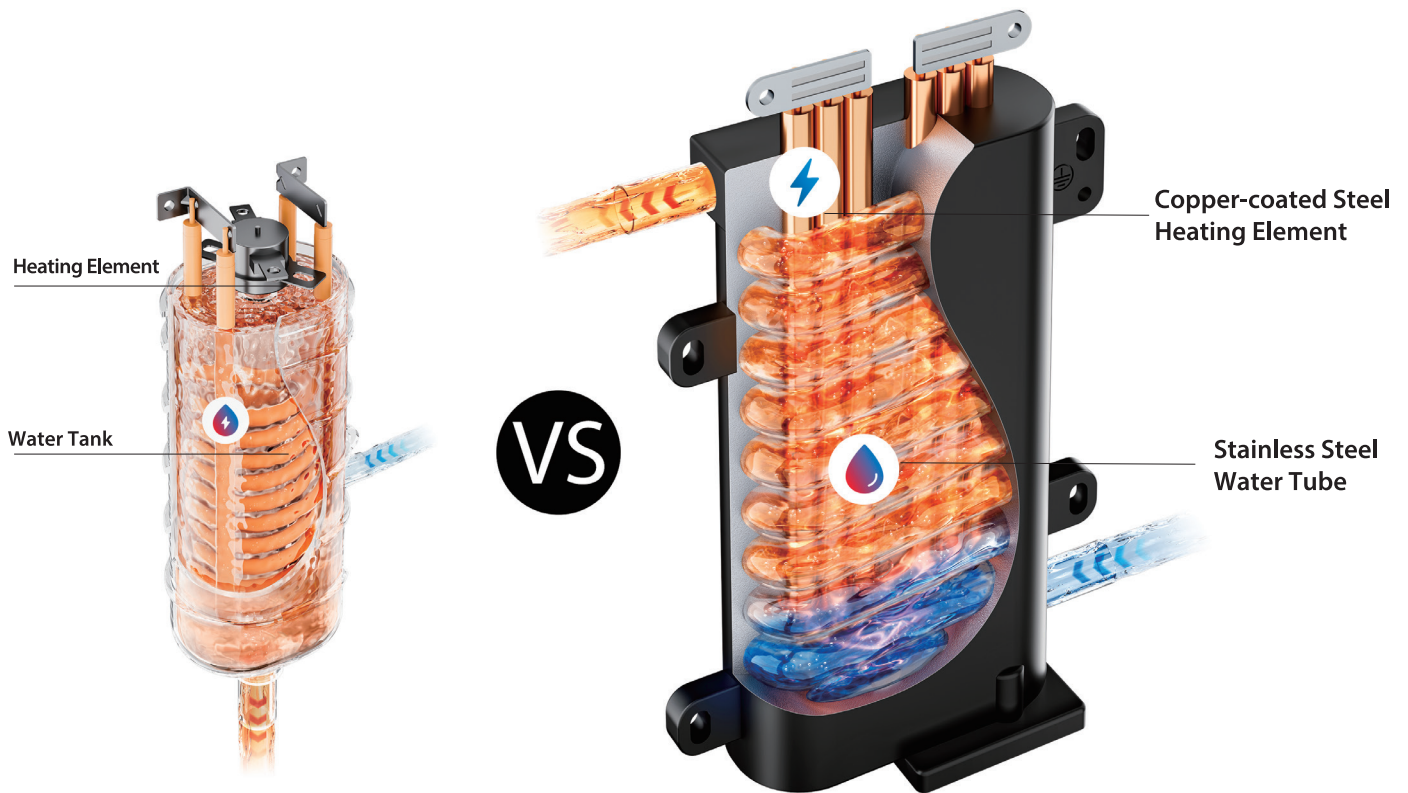

Adapts

Water-Electricity Separated Heater

Automatically adapts its heating power to reach the shower temperature you set.

SAFEGUARD SYSTEM

WATER-ELECTRICITY SEPARATED HEATER

Traditional Heater

The heating elements are soaked in water. Direct contact between water and the heater can lead to corrosion and potential electrical leakage.

Water-Electricity Separated Heater

The heating elements and water are separated to thoroughly avoid corrosion of the heating elements by water, thus significantly reducing the possibility of electrical leakage and ensuring users' safety.

Toshiba always insists a more strict safety principle to ensure customers' safety.

SensTemp™ water heaters equipped water-electricity separated heater, V0 fire-proof material and ELCB protection.

V0
FIRE-PROOF

ELCB PROTECTION

IMMERSIVE SHOWER

DC PUMP

The high-quality DC pump greatly increases water pressure, bringing you a hydro massage at home. It will not disturb your peaceful life, as its 38dB(A) operation sound is quieter than the refrigerator buzzing.
