99% STERILIZATION AND DEODORIZATION

PureAIR actively releases electrons to sterilize and deodorize the entire fridge, eliminating harmful bacteria and preserving the natural taste of food.

INDUSTRY-LEADING PURIFICATION EFFICIENCY

With one click, PureAIR Turbo mode activates, purifying three times faster than normal mode, perfect for those who enjoy traditional foods with strong flavors such as spicy tom yum soup.

3-LEVEL PURE ICE SYSTEM

A 3-level purification system consisting of a water filter, food-grade material and PureAIR ensures that the ice cubes are hygienic, odorless and ready to eat without washing.

JAPANDi STYLE AESTHETICS

Perfectly adapts to various space styles

The integrated flat design seamlessly blends into various spaces. Whether placed side by side or stacked, it can be flexibly installed, freeing up living space and make the home environment more harmonious and aesthetically pleasing.

JAPAN QUALITY

Takumi wood-grain panel & weather-resistant materials

10-layer skin-like carved panel
Using wood grain skin-feel technology, it provides a natural touch while offering anti-glare, scratch-resistant, and stain-resistant features.

Anti-rust & anti-yellowing

The body features a composite structure, with carefully selected PCM steel plates and imported Japanese coatings. This effectively blocks ultraviolet rays and moisture, providing rust and yellowing resistance, ensuring long-lasting use as if new.

Reddot design award
TOSHIBA unique visual communication.

DRYER

HEAT PUMP SYSTEM

Gently dry clothes at the ideal temperature

Garment shrinkage and damage are common concerns when using a dryer, especially for delicate garments. TOSHIBA's heat pump gentle drying technology keeps clothes at low temperatures, effectively preventing over-drying and helping maintain the original softness and comfort of garments.

DUAL INVERTER

Ultimate performance and drying experience

TOSHIBA's inverter compressor and motor adjust the drying speed and frequency to precisely control the temperature, creating ideal drying conditions for your clothes. This not only enhances drying performance but also better protects your garments during the drying process.

HYGIENE CARE

Keeps daily clothes safe & hygienic effortlessly

It is crucial to keep the daily items we use clean and safe in order to protect ourselves. Hygiene sanitization with UV light can effectively eliminate bacteria and other invisible threats that may lurk deep within the fibers, providing maximum protection for the family.

LUXECARE

Waterless clothes care expert

Equipped with an independent steam generation device, it generates powerful small molecular steam, which can quickly penetrate deep into clothing fibers at 360°. With one click, you can start professional drying care and easily care for waterless clothes at home.

WASHER

GREATSTEAM

99.99%* sanitization

High temperature vaporizes water and generates hot steam that rises up to fill the whole drum space and contacts every corner of the clothes. Hot steam penetrates deep into the fibers and thoroughly saturates fabrics.

SENSEDOSE™

One fill for multiple washes

TOSHIBA patented SENSEDOSE™ technology provides accurate and automatic detergent dosing to improve cleaning performance and avoid residues and waste.

HYGIENE CARE

All-round protection for washing environment

- Ag+ sanitization
- Drum clean
- Anti-bacteria gasket
- Door spray

AROMA+

200%* extra fragrance

One click to lock scents and freshness. Thanks to TOSHIBA's great washing technology, stains are thoroughly removed and fragrance can be better activated.

Reactive oxygen technology
Through electrocatalysis, water molecules are ionized to produce five types of Reactive Oxygen Species (ROS): O₃, ·OH, ·O₂, ·OOH, and ·O. These ROS oxidize and break down naturally peeling clothing dyes and stains in wash water, delivering enhanced color protection, deep whitening, and powerful stain removal.

POWERFUL INDUCTION HEATING

Induction heating (IH) comes with magnetic power that heat the internal pot itself in the high temperature. The whole pot is heated evenly and quickly to delivers fluffy and tasty rice.

SUGAR-REMOVING BASKET

The #304 food grade stainless steel basket isolated the unhealthy digestive starch from rice into the water at the precise temperature while still retaining nutrients.

OPTIMAL SIMMERING PROCESS

The process provides the precise temperature and time under 300 pa micro-pressure. The rice is properly cooked to increase the amount of resistant starch (RS), which is not digestible in our bodies so it is not converted into fat or sugar. With #304 food grade stainless steel detachable inner lid.

3MM 7-LAYER INNER

Super thick with 7-layer inner pot transfers the heat evenly to deliver the fluffy and tasty rice.

* Subjected to type of rices

ULTRA PURE AIR PURIFICATION TECHNOLOGY

Ultra PURE filter (PM1.0) can filter out dust that is invisible to the naked eye such as cigarette smoke, with an efficiency of over 85%.

Leuconostoc enzyme Has antibacterial and antiviral properties, especially against avian influenza virus (H5N1), reducing the number of bacteria and viruses that reproduce, ensuring health safety. The ability to inhibit bacteria up to 99.9%.

ANTI-FOULING TECHNOLOGY MAGIC COIL

During operation, water vapor will condense into droplets on the aluminum fins of the evaporator, making it easy for dirt, old, and bacteria to grow.

The air conditioner is coated with high-grade anti-fouling layer for aluminum fins, allowing water to flow away, carrying away dirt.

Optimizes air purification capacity and especially reduce maintenance and cleaning cost of air conditioner.

SAVE ECO POWER

ECO mode helps to cool efficiently and is environmentally friendly. The set temperature will increase by 1°C after 1 hour and will increase by a maximum of 2°C until the machine is turned off. This helps you save up to 25% of electricity when using it.

SELF-CLEANING FUNCTION

After pressing the POWER button once, the fan will continue to operate for another 20 minutes to dry the cold, limiting moisture easily to produce bacteria.

When you want to stop immediately, just press the POWER button 2 more times within 30 seconds.
