- IoT TSmartLife Control

**30L SUPERHEATED
STEAM OVEN**

PURE ICE

Equipped with a UV lamp for all-day sterilization, destroying the DNA of bacteria, viruses, and other micro-organisms, with a sterilization rate of up to 99.9%. Effectively cleans tanks, pipes, and ice to ensure clean and hygienic ice. And the industry's fastest 2-minute auto-cleaning is easy and quick to operate, which avoids forgetting, and ensures that the ice room is always clean and running efficiently.

PURE AIR

PureAIR keeps your food fresh and your family healthy by eliminating harmful bacteria while preserving original flavors.

- 99.99%+ Sterilization rate
- 99%+ Deodorization rate

HYDROFRESH 2.0

HydroFRESH 2.0 extends the freshness layer from one to two. The upper drawer is suitable for storing fruit, while the lower drawer has a higher humidity which provides an ideal storage environment for vegetables.

FRESH HUB

The Fresh Hub's 3 variable temperature settings provide the best storage environment for different ingredients. It is also equipped with a 7mm aluminium super-conducting plate to accelerate the temperature conduction and further lock the nutrients and flavours of ingredients.

MULTI MODE FROZEN ZONE

Three quick-freezing modes to meet the preservation and processing needs of different ingredients.

- Vegetable freezing
- Vegetable freeze-drying
- Warm food speedy cooling

DUAL COOLING SYSTEM

Two independent evaporators and fans provide efficient cooling performance and precise temperature control for the freezer and refrigerator compartments, effectively preventing odours and creating a healthier storage environment.

i-Touch OPEN

Effortlessly open the refrigerator with any part of your body, even through clothing. The uniform speed door opening motor provides smooth and quiet operation.

60-Minute Ice Making

Adopting the industry's advanced ice-making technology, one batch of ice can be made in 60 minutes to meet daily household needs. 23L large-capacity ice storage space can easily cope with family gatherings and other scenarios, providing a convenient ice-making and storage experience.

684L LARGE CAPACITY

With a footprint of 0.58m², this refrigerator offers an impressive 684L capacity, including 330L freezer space, making it the perfect solution for efficient home storage without compromising on valuable space.

30L SUPERHEATED STEAM OVEN

PUREAIR PURIFICATION

Clean Air Matters

Emits high-energy electrolytic ions everywhere, eliminating fridge odors. Also, metal catalysts break down odor-causing bacteria to improve purification.

With a 99% sterilization rate and a 99% deodorization rate, Toshiba can keep your meat and veggies safe and clean.

HYDROFRESH FRUITS & VEGETABLES

Stable, even and optimal humidity.

The moist cold air is pushed to the cabin and filtered through a Japanese-made UNIT film to create a 0.4-nanometer water mist, a 1/5,000,000 raindrop. After feeding the fruits and vegetables, the water mist creates enormous drops that block more water vapor inside the box, maintaining cabin humidity.

Toshiba's PureAIR technology also helps keep produce fresher for longer.

60-MIN QUICK ICE MAKING

Time Matters: Toshiba Makes Ice in 60 Minutes Only

With the dedicated ice-making cooling air out, the distance between the ice box and air outlet is over 300mm shorter than with an indoor ice maker.

Therefore, making ice is faster and more effective. It can prevent odor transfer and shorten freezer time.

ORIGINFRESH™ FISH & MEAT

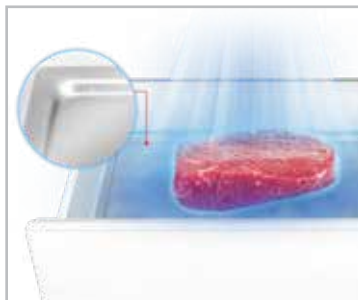

Preserving the best of fish and meat.

-1°C Pro Aging

More Glutamic Acid, More Tender

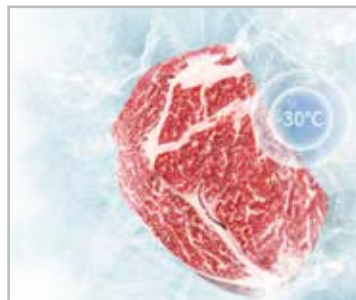

Enhance the flavor and texture of fish and meat by storing in moisturizing, sterilizing environment at a consistent -1°C temperature

-3°C Soft-freezing

7 Day Fresh, Cook without Defrost

Huge airflow across metal plates chills fish and meat quickly. Continuous circulation and transmission of non-freezing -5°C to -3°C moist cold air maintains the slightly frozen state and condenses the fresh, natural flavor.

-30°C Deep Freeze

Savor the Origin Fresh of Premium Ingredients

Flavorful high-grade waggly must be preserved properly. TOSHIBA's -30°C deep freeze expedites ingredient ice crystal production, preventing food cell ice crystals, cytoplasm outflow, and condensation.

MINIMALISM

600mm Depth, SeamlessFit into Cabinets

Innovative design from Toshiba optimizes kitchen and living space. 600mm fits easily into ordinary cabinets, creating effortless integration. No blind areas, easy floor and house cleaning.

COZINESS

Human-centric Lighting to Create a Haggy Atmosphere

When a body is detected within 70cm, the waistline lights automatically turn on and emit a warm 2700k light, ideal for use at night.

Huge overhead light illuminates the interior room in 3 seconds with a pleasant, even glow.

24L CONVECTION WITH AIR FRY MICROWAVE OVEN

PREMIUM CHERRY WOOD
 Inspired by natural Cherry Wood, the handle's unique grain and warm finish bring a touch of natural elegance and durability to the kitchen.

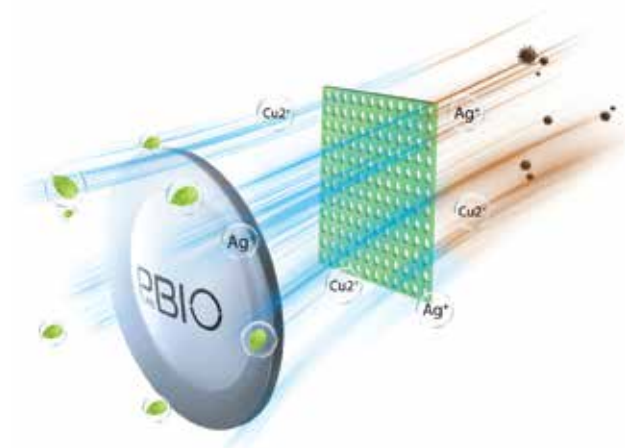

WELCOME LIGHT
 Featuring a millimeter wave sensor that seamlessly adjusts lighting based on your presence, creating a warm and welcoming atmosphere for your home. The lights brighten directly when you are within 1 meter of the refrigerator, providing a guiding light during nighttime hours. As long as you remain nearby, the lights stay on, and when no moving objects are detected, the lights dim directly.

SEAMLESSFIT
600mm Depth, SeamlessFit into Cabinets
 Innovative design from Toshiba optimizes kitchen and living space. 600mm fits easily into ordinary cabinets, creating effortless integration. No blind areas, easy floor and house cleaning.

JADE TEXTURED GREY
 With its warm beige shade like the soft glow of amber, the refrigerator adds a touch of refined Eastern elegance to the kitchen, effortlessly blending into the cozy family atmosphere.

DUAL COOLING SYSTEM
 It features two independent evaporators that provide optimal cooling performance and precise temperature control in both the freezer and refrigerator compartments. This prevents flavour transfer and maintains the original taste and freshness of ingredients, ensuring a fresher, healthier storage environment.

PureBio
 Featuring an advanced silver-ion (Ag+) catalyst, PureBio effectively neutralizes unpleasant odors and inhibits bacterial growth, prolonging food freshness through scientifically enhanced preservation.

ORIGIN INVERTER
 Inverter compressor and inverter fan. The fan automatically senses changes in the compressor's cooling capacity and adjusts speed in 4 levels.

-30°C DEEP FREEZE
 -30°C ultra-low temperature minimizes damage to the cellular structure of ingredients by generating smaller ice crystals, ensuring that the ingredients are fresh while maintaining their original nutrition and quality.

JAPANDI STYLE AESTHETICS

Perfectly adapts to various space styles

The integrated flat design seamlessly blends into various spaces. Whether placed side by side or stacked, it can be flexibly installed, freeing up living space and make the home environment more harmonious and aesthetically pleasing.

JAPAN QUALITY

Takumi wood-grain panel & weather-resistant materials

10-layer skin-like carved panel

Using wood grain skin-feel technology, it provides a natural touch while offering anti-glare, scratch-resistant, and stain-resistant features.

Anti-rust & anti-yellowing

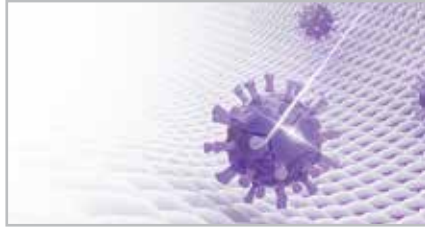

The body features a composite structure, with carefully selected PCM steel plates and imported Japanese coatings. This effectively blocks ultraviolet rays and moisture, providing rust and yellowing resistance, ensuring long-lasting use as if new.

Reddot design award
TOSHIBA unique visual communication.

DRYER

HYGIENE CARE

Keeps daily clothes safe & hygienic effortlessly

It is crucial to keep the daily items we use clean and safe in order to protect ourselves. Hygiene sanitization with UV light can effectively eliminate bacteria and other invisible threats that may lurk deep within the fibers, providing maximum protection for the family.

HEAT PUMP SYSTEM

Gently dry clothes at the ideal temperature

Garment shrinkage and damage are common concerns when using a dryer, especially for delicate garments. TOSHIBA's heat pump gentle drying technology keeps clothes at low temperatures, effectively preventing over-drying and helping maintain the original softness and comfort of garments.

LUXECARE

Waterless clothes care expert

Equipped with an independent steam generation device, it generates powerful small molecular steam, which can quickly penetrate deep into clothing fibers at 360°. With one click, you can start professional drying care and easily care for waterless clothes at home.

5-LAYER LINT FILTER

Designed specifically for pet-owning families

The filter has been upgraded to a six-layer system, effectively collecting pet hair, pollen, dust, and more. This upgrade prevents secondary pollution of clothes and drum while also removing more pet hair from pet beds and clothing, making every hug even cozier.

WASHER

REACTIVE OXYGEN TECHNOLOGY

Through electrocatalysis, water molecules are ionized to produce five types of Reactive Oxygen Species (ROS): O₃, ·OH, ·O₂, ·OOH, and ·O. These ROS oxidize and break down naturally peeling clothing dyes and stains in wash water, delivering enhanced color protection, deep whitening, and powerful stain removal.

*For TW-T37BZP140MWM(WT) 13 Kg Washer only

GREAT STEAM

99.99%* sanitization

High temperature vaporizes water and generates hot steam that rises up to fill the whole drum space and contacts every corner of the clothes. Hot steam penetrates deep into the fibers and thoroughly saturates fabrics.

AROMA+

200%* extra fragrance

One click to lock scents and freshness. Thanks to TOSHIBA's great washing technology, stains are thoroughly removed and fragrance can be better activated.

SENSEDOSE™

One fill for multiple washes

TOSHIBA patented SENSEDOSE™ technology provides accurate and automatic detergent dosing to improve cleaning performance and avoid residues and waste.

Liner Power Control

Precise & Steady Heat

ChefDefrost Quicker and Evener

ChefDefrost is an innovative technology that enables defrosting with shorter time yet better results. The steam microwave oven smartly adjusts the power in 4 stages according to the weight of the meat, gently defrosting the meat and restoring it to freshness. Defrost time shortens from 15 minutes to 9 minutes, 40%* faster. **Internal lab data*

ChefFry

Less Oil, Low Fat but Still Crunchy
With advanced air fry technology, you can enjoy fried food in a healthier way without scarifying the joy of crunchy taste. Little drops of oil is needed for the whole air fry progress as the powerful hot air from convection fan and heating elements circulate around the food and create a crisp crust.

ChefGrill

Remarkably Impressive Grilling
With strong grill power, the metal upper heating elements deliver heat directly at food evenly, creating an unforgettable texture that tastes crispy outside, and juicy inside.

ORIGIN INVERTER

MX2-STR25SF(WH) with ORIGIN INVERTER delivers precise and consistent power output. Moreover, with ORIGIN INVERTER, it would be lighter in weight and work quieter than traditional ones.

- Wide Voltage Range: **170-270V**
 - Defrosting Rate Improved by **66%***
- *Internal lab data*

SUPERHEATED STEAM Crispy and Healthy

Steam is further heated up to **230°C** and become "invisible". The "invisible steam" penetrates the food, helping to eliminate excess calories and salt. Grilling can be an even healthier option.

- Calories reduced by **33%***
- Salinity reduced by **27%***

**Internal lab data*

45 PRESET MENUS

Easily Meets Your Daily Needs

The preset menus will help you cook in an easier way. Toshiba carefully designs these menus tailored to your taste bud, covering grilling, baking and more.

SMART CONNECT WITH TSmartLife APP

Cook Like A Pro with Online Recipes

Unleash your cooking passions with world-wide recipes on the TSmartLife App. Just follow the steps from recipes to prepare ingredients. The steam microwave oven will set the ideal timer and power automatically, and you can start your amazing cooking journey!

LARGE WATER TANK

40 Minutes Continuous Steaming

Water tank capacity is 600ml, and it can be used up to 40 minutes. External water tank located at bottom of the steam microwave oven enables you to add water without opening the oven door, so that steam can be maintained inside.

ULTRA PURE AIR PURIFICATION TECHNOLOGY

Ultra PURE filter (PM1.0) can filter out dust that is invisible to the naked eye such as cigarette smoke, with an efficiency of over 85%.

SAVE ECO POWER

ECO mode helps to cool efficiently and is environmentally friendly. The set temperature will increase by 1°C after 1 hour and will increase by a maximum of 2°C until the machine is turned off. This helps you save up to 25% of electricity when using it.

ANTI-FOULING TECHNOLOGY MAGIC COIL

During operation, water vapor will condense into droplets on the aluminum fins of the evaporator, making it easy for dirt, old, and bacteria to grow.

The air conditioner is coated with high-grade anti-fouling layer for aluminum fins, allowing water to flow away, carrying away dirt.

Optimizes air purification capacity and especially reduce maintenance and cleaning cost of air conditioner.

SELF-CLEANING FUNCTION

After pressing the POWER button once, the fan will continue to operate for another 20 minutes to dry the cold, limiting moisture easily to produce bacteria.

When you want to stop immediately, just press the POWER button 2 more times within 30 seconds.

TOSHIBA

365 DAYS

1 TO 1 EXCHANGE

* Image is for illustration purpose only

Terms & Conditions:

- Promotion period 15th August 2025 - 31st December 2026.
